

**THE COMMISSIONERS OF FIRE DISTRICT NO. 1  
IN THE TOWNSHIP OF DEPTFORD, COUNTY OF GLOUCESTER**

**Resolution to Correct 2013 Proposed Budget for  
Adjustment of Capital Expenditure Amount  
2012-48**

---

**WHEREAS**, the Fire District has previously determined that certain fire apparatus will be in need of refurbishment in the year 2013; and

**WHEREAS**, the voters of the Fire District via a ballot question at the annual election held on February 18, 2012 approved a capital expenditure for such refurbishment, by authorizing the Fire District to take \$650,000.00 from the Fire District's capital reserve account and allocate that amount as a capital line item on the Fire District's 2013 annual budget pursuant to N.J.S.A. 40A:14-84 for the refurbishment of certain apparatus, namely, a fire vehicle; and

**WHEREAS**, the Fire District on November 14, 2012 approved the 2013 Proposed Annual Budget, including such capital expenditure as a line item; and

**WHEREAS**, the Fire District as required by its original resolution and ballot question has since solicited and received proposals for such refurbishment in accordance with the requirements of the Local Public Contracts Law N.J.S.A. 40A:11-1 et seq.; and

**WHEREAS**, as a result of the receipt of such proposals, the Fire District has determined that only \$465,000 is needed to be taken from the Fire District's capital reserve account for such refurbishment;

**WHEREAS**, the Fire District as part of the Second Reading of the 2013 Proposed Annual Budget on December 12, 2012 has determined that the capital expenditure and transfer from the capital reserve account should be adjusted to only transfer and spend the amount necessary for the refurbishment.

**NOW THEREFORE, be it RESOLVED,** by the Commissioners of Fire District No. 1 in the Township of Deptford, County of Gloucester, that the 2013 Proposed Annual Budget shall be corrected so that \$465,000 will be taken from the Fire District's capital reserve account and allocated as a capital expenditure for the refurbishment of certain apparatus, namely, a fire vehicle (instead of the entire \$650,000.000 previously estimated).
